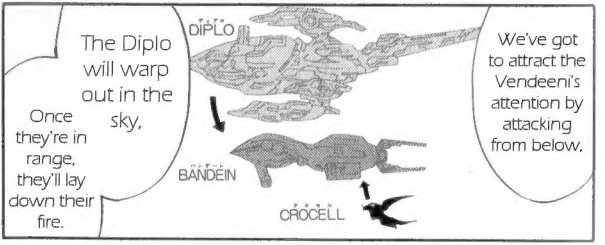
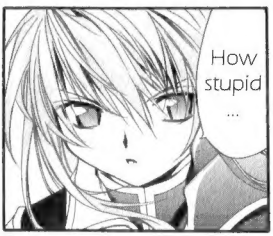
Your Majesty.
Well then, we'll be off.
May Apris watch over you.
Yes...
I know.
Excellency.
If you would,

Phase 26: Father

We can't contact the Diplo...
Are we really gonna be okay...?



The Diplo will warp out in the sky,
Once they're in range, they'll lay down their fire.
DIPLO
BANDEIN
CROCELL
We've got to attract the Vendeeni's attention by attacking from below.



How stupid ...

If the Diplo isn't late...
If the weapon is effective ...

Don't worry.
But...
And everything depends on this attack being a surprise.
The Vendeeni are monitering communications.
When we start, they'll know.
The Diplo should be monitoring us at all times.
It'll be fine!
I'm the one who trained all those guys.
Seems like we don't have anymore time to chat.
At least if the weapon works, that is...
Right....

Look at that!!
It'll be coming out of the clouds any second!
Starting the charge!
It's all on the first attack...
We've got to keep their shields from going up.
But if the Diplo doesn't come soon....

Did it work?
When you look at it like this..
It really is huge...
Here we go!!

When you look at it like this...
It really is huge...
Here we go!!

Did it work..?

No-
here it
comes!
フォォ
フォォ
フォォ
It's
here.
Damn!!
We
didn't
even
scratch
it!

Diplo to Maria!

Please respond!

Mari-etta?

The prepar-ations for the attack are ...

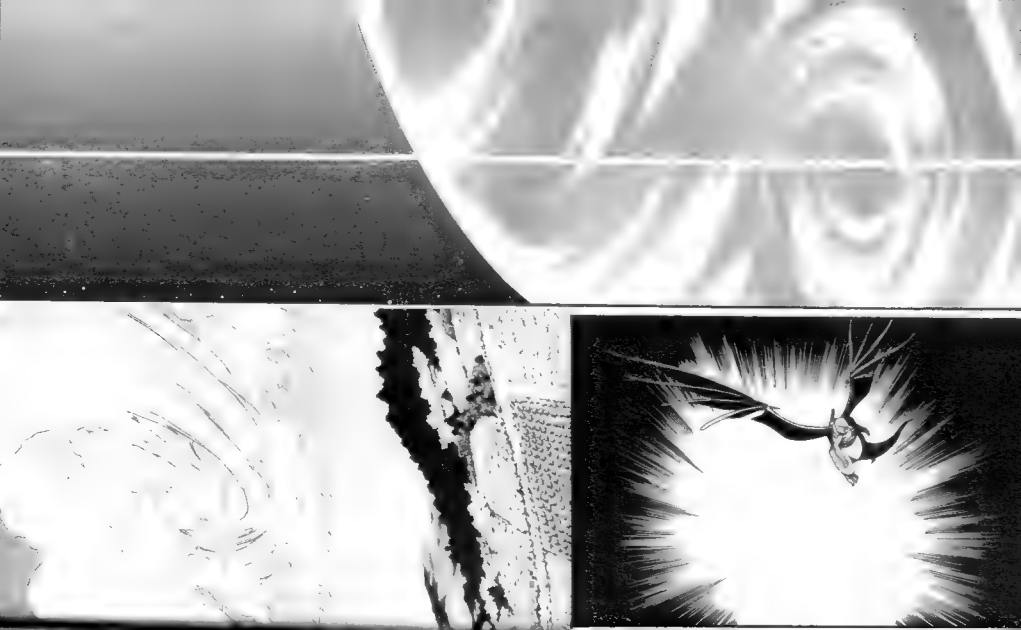
There, see...

Then why This feeling

This is

No!! Stay away!!

Don't come any closer!!



ゴルッ

No.. Was that
Da. d.

What in the world was that..?
I don't know.
It wasn't from our side, that's for sure...
Marietta! Answer me! Marietta!
-tain!
Are you all right, Captain?!
The Diplo is fine!

Calm down! What's happened?!
EEEEEHHH?!
I'm sorry... Everything's crazy up here...
Marietta, what was..
They want to have a prisoner exchange!
A transmission... On the federation's frequency, from the Vendeen ship!
Then that must mean...!
Prisoner?!

Dad. Thank God....
It's Professor Leingod.
It seems like they got him off that ship from before.
I'll send you the coordinates.
They want to do the trade on the planet.
The Kirlsa training facility.
This is
Work together...? The Federation?!
They want to work together.
What does the Federation's forces have to say?

We can't do anything like this.
Diplo
Could you transport us from here?
Cert-ainly.
Transport To the Diplo?
We can finally leave this planet but
Wait a minute... Maria
Please do it immediately.
Under-stood.
What? Don't start with the stupid sentiment.
The professor's still in the hands of the Vendeeni, after all.
Yeah . I know, but

The transport is starting !
This is
What are you saying..?!
What ?
It's too bad, but Goodbye, Nel.
No helping it...
This is...
We're going back to our world

That's.
Wait..
We've caused you a lot of trouble
Sorry, Nel-san ..
Later, Nel.
We definitely
About our time with all of you .
Won't forget
They .. vanished...
.....

That ship is going so far
They said they were going back ?
To their own world.

They really are.
Always in a hurry..

ﾆｭｳｳｳｳ…
This is inside the space ship
I'm back among space faring peoples
Well well. .
We're finally back home
This way, Fayt
I'll show you around

Good to see you're okay.
Welcome back!

Thank you very much!
That warp-out before... It was very well done.

I was just thinking that you really are the Captain..
No.
What?

シクシク…
I'm not embarrassed!
What, are you feeling embarrassed?
I've been saying that this whole time
Let's head to the bridge.
Anyways, I want confirmation.
Glad to see you're all right!
Welcome back, Captain!

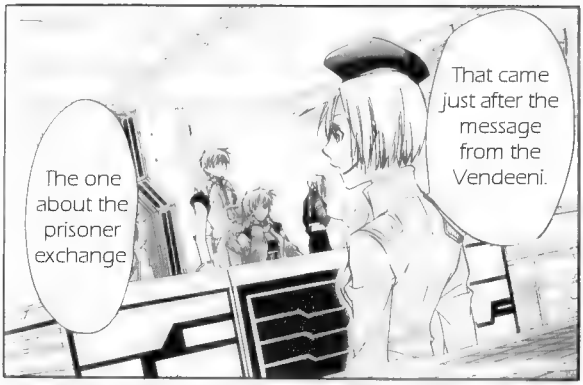
That's
Do we know where that attack came from?
Tell me the situation
We know it came from towards the center of the galaxy and it's heading to Earth, but.
We don't really know.
The Aldians, the Vendeeni, the Federation, none of them have weapons that strong.
We detected over magnitude 3 energy in that beam

It's several centuries ahead of anything around..
No.. I don't think it's a new weapon..
What on Earth is going on..?
A new weapon....

Any word from the Federation....?
If it's like this, I really can't think of an answer.

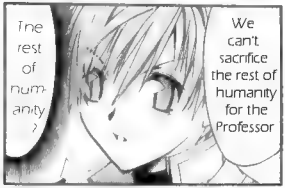
They say that under no circumsances are we to hand over Fayt Leingod
The new Federation ship Aquaelie isn't too far.

So the Federation knows about Dad's research..?
Me...
Over to the Vendeeni...?



That came just after the message from the Vendeeni.
The one about the prisoner exchange

They want to exchange for Fayt Leingod ....



We can't sacrifice the rest of humanity for the Professor
The rest of humanity ?

Aren't you going?

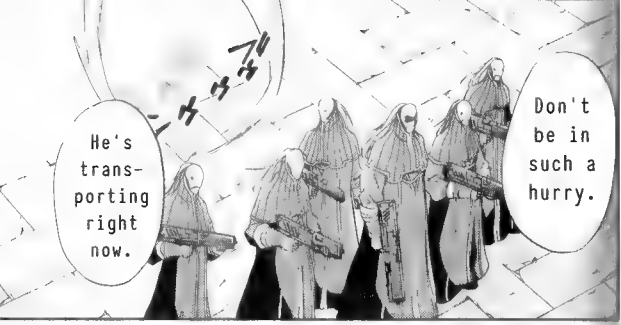
About the experiments done on me
They want to exchange my dad for me
And why I have this power
Did they not get any information from him ?

Cliff
You'll pretend to go along with it,
And then rescue your dad when you get the chance
That way we won't have to fight their ship.
I see..
There's barely any risk
It seems like the Vendeeni are in a hurry
They had no way to deal with that attack before
So they want our power as soon as possible
At that place, probably..
They'll want to have a strategy and equipment prepared
Yes..
We don't have much time until the exchange.

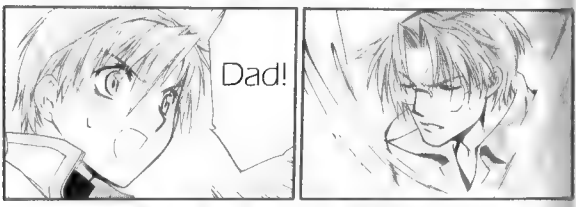
We've come this far!
We've gotta go!
It's danger ous, but .
They don't intend to give us time to prepare
It's almost like Dad knew everything
I'll go down this path you believed in, along with everyone
Please lend me your power
Yeah.. You're right

Kirlsa Training Facility.
Isn't the Black Brigade stationed here? There isn't a single person
Is it because the war is over?
My heart is pound ing
It's probably just my imagin ation
Here they come.

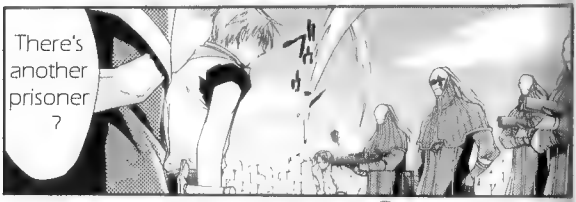
We finally meet.
Fayt Leingod.
You must be... Biwig, am I right?
There sure are a lot of them.
Hmph... You two have "powers".
Naturally we have to take precautions.
Where's my dad?



He's transporting right now.
Don't be in such a hurry.



Dad!



There's another prisoner?

That's...
Could it be

So...
Sophia...!!

Is that... Fayt...?
What. Why..?
Fayt...
I'm afraid I must put an end to this joyful reunion.
Let us begin negotiations.
Ku...
You kidnapped them. And you call this negotiations?!

Gu-. !
Oh... And don't even think of using your "power"...
You...!!
Did you say "power" ?
"Power" ..?
Is your name...
Could you be....
I see .
Traydor ...
Maria Traydor
My name is

This is destiny.
I see
So that's how it is .
Dad. .
Yeah...
Fayt
So you found out .
Traydor... That name takes me back
Silence, Professor.

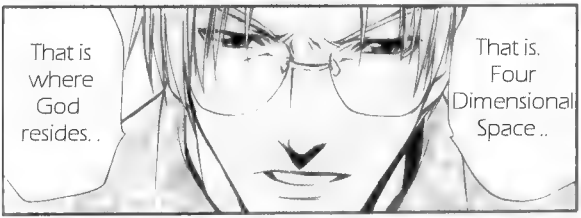
I want to know
Why. Why did you experiment on us, turn us into living weapons.
That's.
It was to save the world
That's why
Even if you don't believe me..
That's the truth
We weren't insane.
And at the end of the research we finally had our answer.

Your power is ..
"Alter-ation".
Maria...

It's the power to alter its substance, or its data
The world's very existance ..

To stabilize the data over FD space...
And at that place..

Dad, what're you...
FD space ...?



That is where God resides. .
That is. Four Dimensional Space ..

You still haven't reached the starting point of that journey.
That is where you're meant to go..

"Destruction."
What are you talk-ing about?!
Dad
Fayt
That's the name of your power
You can break the laws of physics in this world
And you can bring this world's laws into FD Space

With that power..
You can challenge God...!!

What are they?

After all... Are you saying you've started it?

If it's like that you must be quite confi-dent.
God... is it.

As I thought, we cannot allow you to go free, Professor.

You'll be coming with us.
You all as well,
If I use my power, Dad and Sophia could get caught in it
Damn
Don't move ...
Well. I suppose it's unfair to ask you to kill your family..
Dad...
Fayt
Don't hesitate

No matter how hard it gets Never give up!
Promise me, Fayt!
Dad...?
D...
Then this is all I can do!
If you won't fight for fear for the hostages,
Sto-
....

Impossible...

Dad....!!

Phase 27: Reunion

Biwig ..... !!
You ..... !!
Fa.
Fayt ..... ?!
Don't move!
We still have one more hostage!

Damn .... !!
Sophia ...!!
I've only got one person to aim at now ...
This is...

Flying Guillotine!
This technique!
Gu... This is...!

What do you think you're doing, using my castle so leisurely?
You're.
ギッ
ぐ…っ!

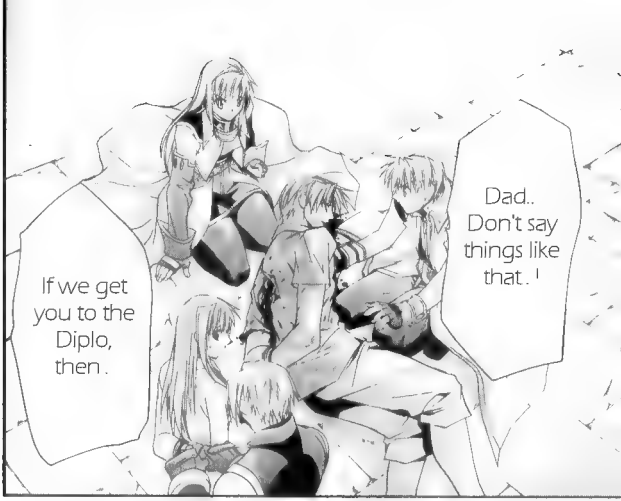
Nel-san...
Albel, Roger!!
Why are you..
Guys

So we had Lord Crosell take us here.
You said you had some kind of business at Kirlsa, didn't you?

Don't be cheeky!
You guys!
You guys just can't manage without me!
I'm glad we were in time.
Her Majesty told me to go and see the world.
We want to continue traveling with you.
You guys have a right to know everything too
I get it
Of course
Are you ready to risk your lives for it?

FAYT...!!
Fayt
I missed you.
Sophia .me too
Prof-essor .....!!

Dad...!!
!!
.....
Dad !!
Why did you do such a crazy thing..
Listen, Fayt ..
There isn't much time



Dad.. Don't say things like that.!
If we get you to the Diplo, then.

It has all of my research on you... You can get all of your answers there...
If it's you, you can bypass the password..
You need to go to the moon-base lab...

Marietta?! I'm losing the signal!
...da... sen... firmati... ...?

...
Fayt...
Save...
the
world...

Uncle
...!!
Dad...

Dad...!!

We're going to bring you back while we can!!
Cap...tain ...eeni... ginning their... ttack...
Let's go, Fayt

Yeah I know.
We don't have time to be sad
It's all right, Sophia
Fayt..?
We'll talk about it properly later...
A lot of unbelievable things have happened...
We've just got to keep moving forward...
I just can't afford to think about it right now...

I still don't know what you left behind
Dad I can't look back anymore
And I couldn't protect him
He bet his life,
When will all this sadness end ?

ゴオオ…

This is unbe-lievable.
This place is above the sky..
T-T-T-T-this place..
It coul-dn't fall, could it?
It's not falling
So long as we don't get att-acked!
Maria!
This shak-ing is.
I don't know.
Let's get to the bridge!

We've got attacks coming from two different Vendeeni ships!
Marietta! Report!
Cap tain!!
This is . !!
The Vendeeni ships!

And what happens if we are attacked?!
Then I guess.. We fall ?
おはは
The shields have fallen to 30%!
Damn !
We need to hurry to Moon base

Listen, you
What-

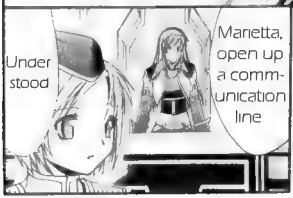
What do we do if we're falling?!

They're going to fire their elimination cannons!
They're getting ready!!

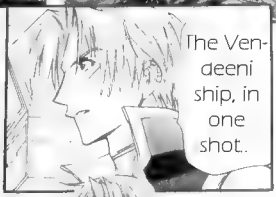
ズーン
ズーン
The Diplo isn't a battle-ship.
Those guys are way better armed than us.
Don't we have any weap-ons?!
But the Vendeeni know that too..
If we can at least escape the planet's gravitational field, we should be able to escape
Hold on just a moment, Quark gentle-men.
If it's like this
ゴ
What should we do..
オレ

The Vendeeni ship is seriously damaged!
It's a creation cannon!
That's
I

This is the Galactic Federation's warship Aquaelie.
Vendeeni ship,
If you wish to continue this battle, we will not hesitate to sink you.
That's the Federation's new ship!
The Aquaelie, huh
Ready the Creation Cannon!
Target the Vendeeni ship!
So you wish to continue this battle.



Under stood
Marietta, open up a comm-unication line



The Ven-deeni ship, in one shot..

We're thankful for your assis-tance.
Diplo to the Aquaelie.

I am Wittcomb, commander of the Aquaelie.
A pleasure to meet you, ladies and gentlemen of Quark.
It's sudden, but I have a proposal for you.
You're very young.
So you're the captain, Maria Traydor, huh...
Hey, Maria !
I see.
Wha...?!
We want you to return to Earth along with the Aquaelie.
That had already occured to me.
Maria, it could be a trap!

That's true, but .
We'd have a hard time getting close to Moon-base
As a Quark ship,
I'll be bringing a few people over with me.
All right.
Transferring to the Aquaelie
Standby your weapons and wait until we make contact

Transfer complete.
Entering warp.
Scared?
Riding in a Federation War ship
Well well
I just can't calm down
This is enemy territory
Welcome to the Aquaelie

Allow me to welcome you aboard
I am Commodore Wittcomb.

Dad is .

Where is the professor?
You're Professor Leingod's boy, aren't you?

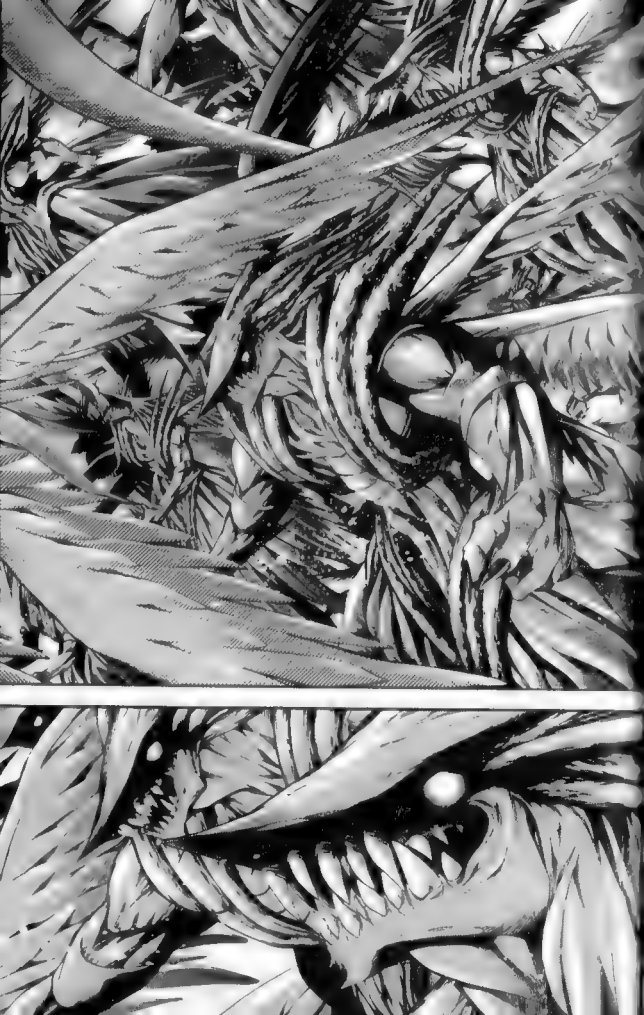
Leingod Research Facility.
He said if we went there, we could understand every thing.
The professor's research should all be at Moon-Base

ジボン
My apologies . that he isn't here.
I should have realized

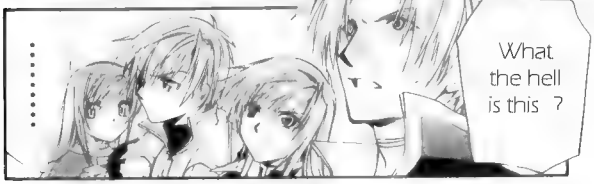
And the professor told us to go there
If it's him, who knows what we'll find
We could use the Professor's data as well..
Human ity is...
That could be true. No, if that is true, then.
You haven't seen it yet?
That's right....
Hum an- ity ?
Take a look at this.

What ....
in the world ....?

What ....
in the world ....?



That... not...! God...!
...elp... under... tack... God's executi..



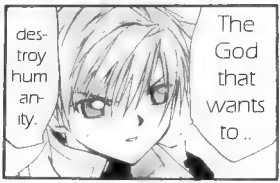
What the hell is this ?
.....

We recieved this signal on Earth
Over 100 hours ago.
This was taken at Space Station 9

They say that man has been practicing forbidden sciences, and God has decided to destroy us
They call themselves "God's Executioners"
Are often just a dictatorship
Those who claim to be sent by God,
It's crazy
You don't believe that, do you?
But a few hours ago.
50,000 light years away,
There was a release of over Class 3 energy.
That could be...!!
Could it have been that...?!

They definitely don't deserve the name of God...
And that flock of monsters that appeared.
randomly in Earth space, that don't look like anything living...

Not just humanity..
Hm. No



destroy humanity.
The God that wants to ..

They don't want to destroy just humanity, if they're going to destroy that..
Their current invasion route is taking them past Aldion. .

That's
But the Professor must have expected this

Only the highest levels of the Federation knew about the professor s research
And no one took it seriously.
But I begin to believe that those Enforcers come from a lost planet of some kind
.....

The Vendeeni knew about it.
They seemed to think you were some kind of key.
They'll do anything for their own survival

Dad did say
That we could save the world..

That's why he used genetic symbology to make us living weapons.
But against monsters like that..

But at least they were polite enough to formally declare war on us...
Destroy the world .. and this universe ..
It sounds like a bad joke.

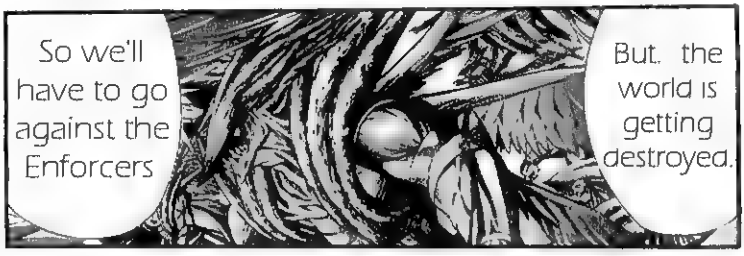
They think they can just take us out?
I don't like it.

And who's cont-rolling them.
But how are they going to carry it out?

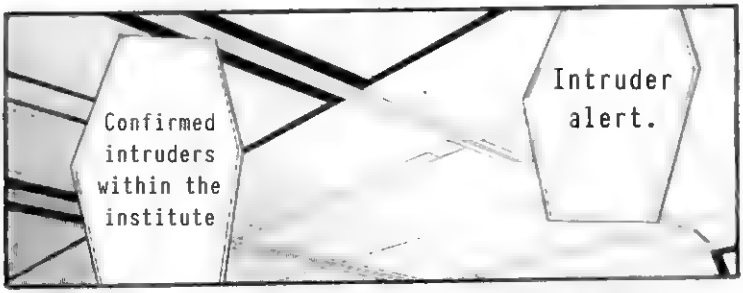
What on Earth did dad know...?
The power to save the world.. huh

Look, Fayt! It's the Earth!
We will soon be beginning Warp Out.
Finally We're back
We will then proceed to Moonbase.

It feels like I'll never get those days back again
It's only been about two weeks since I left, but it feels so much longer
When I started this trip I had no idea any of this would happen
Did he know this would happen?
No Dad
Dad... This time, I'll get all my answers!
Approaching Leingod Laboratories.



Phase 28: New World



Confirmed intruders within the institute
Intruder alert.

Let's hurry
I don't know

It doesn't mean us, does it?
What? Intruders?

This voice
Our symb-ological rese-arch...
First, take a look at this
Dad
And the effects of embedding them in the human gene...
The subjects were my wife, and Mrs. Traydor...
It is forbidden under the law.
Papa?!
Together with Professor Esteed's cooperation.

What are you talking about?
Living weapons... I don't understand.
Sophia Esteed
She's Professor Esteed's daughter
Is she..
Is...
Don't interrupt.
They all seem like such scary people
We won't be able to find anything this way.
We need to narrow our parameters
This isn't the only file I found.
The professor has huge amounts of saved data.

Search for any files containing information on my genes
Com puter
Maybe with a password or something
Where would Dad hide the file..
It should be fine
That should do it, right?
It's the reason we came here.
Bingo.
File found.
Let's play it
Looks like it's a video file. .

If you're watching this,
It means something has happened to me, Robert Leingod.
Fayt... This is something you need to hear...
Dad
And I hope you have the courage to make this decision ...
It was Galactic year 752... We were on our way to explore the planet Styx...
On this planet there was something called a 'Time Gate', which had never been seen before.

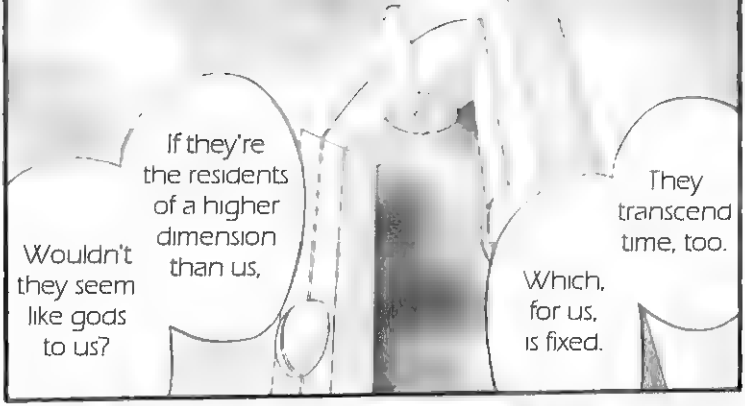
We discovered that by inputting symbological data, you could recieve data from unknown worlds.
Under the right conditions, it could let one navigate through time.

We called them 4D beings.
We discovered the existance of beings who transcended our reality.

Fourth dimensional ..beings..?
4D must be the Fourth Dimension Dad was talking about

Hey, hey. This is all starting to sound a bit like a fairy tale to me...
And it was very likely that they had created our universe.

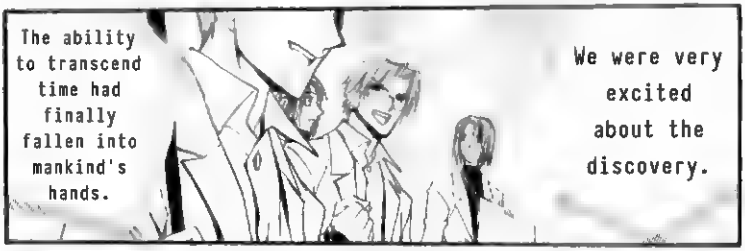
If you know something.
Then tell us.
Huh?
Could it be that ....?
No... But...
And three dimensions is a solid object... that's our world.
One-dimension is a point, and two is a line... a plane.
It's just a thought, but
We live in the third plane, and understand the second.
But if there were beings in the second dimension, they couldn't live here on the third
Because they wouldn't even be able to imagine it.



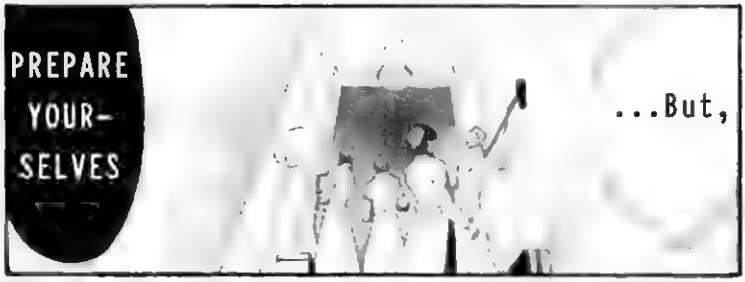
Wouldn't they seem like gods to us?
If they're the residents of a higher dimension than us,
Which, for us, is fixed.
They transcend time, too.

Let's keep watching.
I don't know..

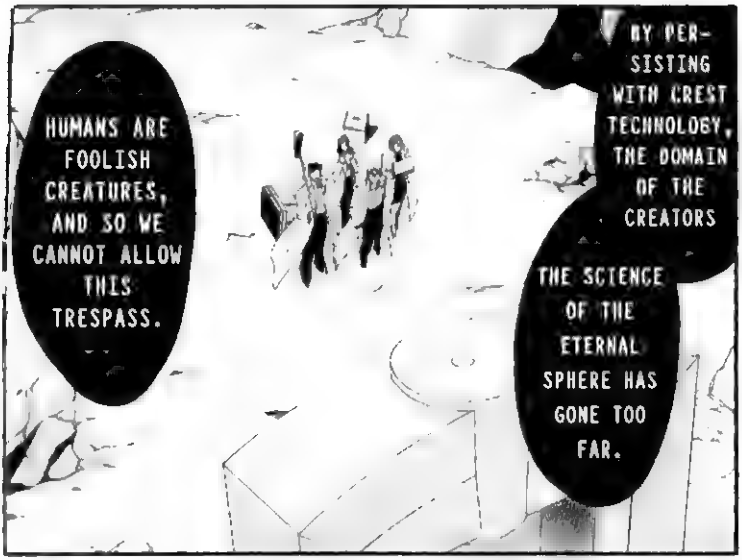
So what's the connection to our powers?
But you don't think they created us



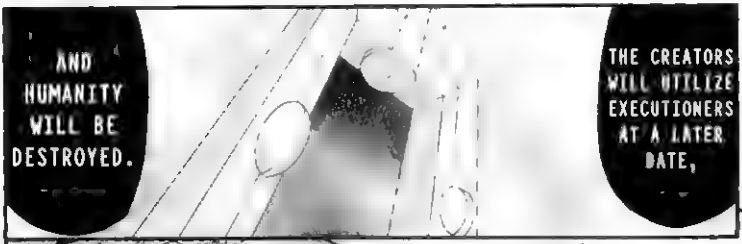
The ability to transcend time had finally fallen into mankind's hands.
We were very excited about the discovery.



PREPARE YOUR-SELVES
...But,



HUMANS ARE FOOLISH CREATURES, AND SO WE CANNOT ALLOW THIS TRESPASS.
BY PERSISTING WITH CREST TECHNOLOGY, THE DOMAIN OF THE CREATORS
THE SCIENCE OF THE ETERNAL SPHERE HAS GONE TOO FAR.

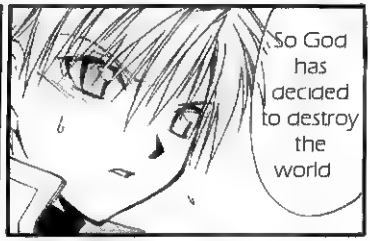


AND HUMANITY WILL BE DESTROYED.
THE CREATORS WILL UTILIZE EXECUTIONERS AT A LATER DATE,

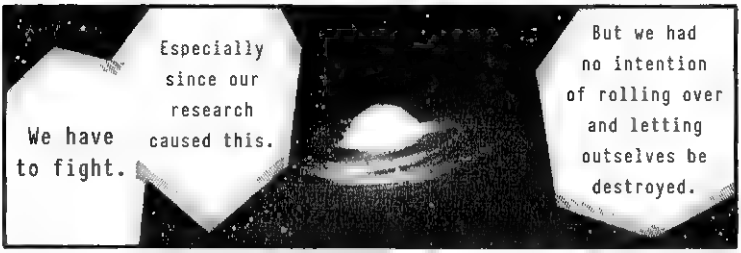
Execu-tioners .?

Are they saying the Creators made those...?
Are...

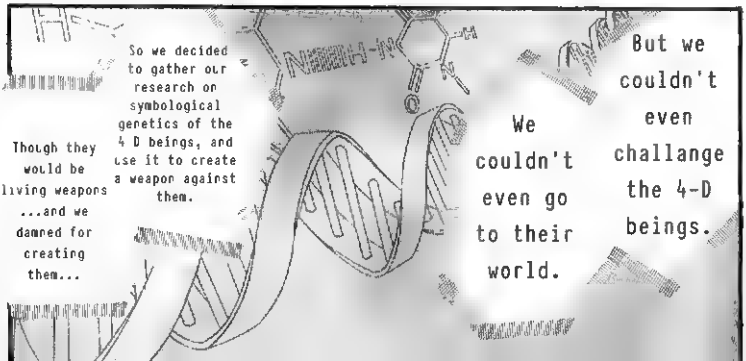
How-ever ...



So God has decided to destroy the world



We have to fight.
Especially since our research caused this.
But we had no intention of rolling over and letting outselves be destroyed.



Though they would be living weapons ...and we damned for creating them...
So we decided to gather our research on symbological genetics of the 4-D beings, and use it to create a weapon against them.
We couldn't even go to their world.
But we couldn't even challange the 4-D beings.

Fayt... Maria... I don't think you'll ever forgive us...
That's why the least we could do is do it to our own children.
But to oppose the 4-D beings we needed one more power.
"Dest-ruction"
"Alter-ation"
.....
But you're the only ones who can save the world ...
We entrusted it to her.
So when Professor Esteed's daughter was born,

M.. Me. ?!
Then, Sophia is...?
But she will lead the way through the Time Gate to the 4-D world.
The child still doesn't have a name.
What?!
This breeze is
The atmos-phere is decom-pressing
The Time Gate on Planet Styx
So that's where we need to go

You're.
You're that girl um. .
Fayt chan ?
Um. ah.
Peppita ..?

I knew it!
I am the mouthpiece of the Executionors
You shall be eliminated
That's ....!!
!!

I will personally purify your existance.
The Executioners will purify this unclean world.
Kyaaaa!
Contam-inants of the world.
Perish.

That was dangerous
Can I use it this power
To destroy the laws of physics in this universe
Then

I
I did it.
Seems like it worked just fine.
Fayt chan, that was amazing!
ぼっ
Are you hurt, Pepp-ita?
What were those? Those mon-sters~

Eeeh?!
The one from before.. It's still alive!!
There's no need for us to stay.
I've transferred the data to the Aquaelie

Our target is Styx!!
Let's head back to the Aquaelie

But...
So many...

There's no way we're going to lose
Yeah.. Besides,
We're fighting for the world.
What the heck is up with Fayt-Chan ....?
And why is he so friendly with her...?
Let's go!!
Don't fall behind, guys!!
W-wait, Fayt-cha~n!!
I see. The Time Gate on Planet Styx
I've also heard of such a tale..

What is their intention, I wonder...
No, not invasion
But an invasion from another dimension...
And is this..
Really alright?
Are you okay, Fayt .?
I can't afford to go into battle and use my power like this, but I don't have a choice

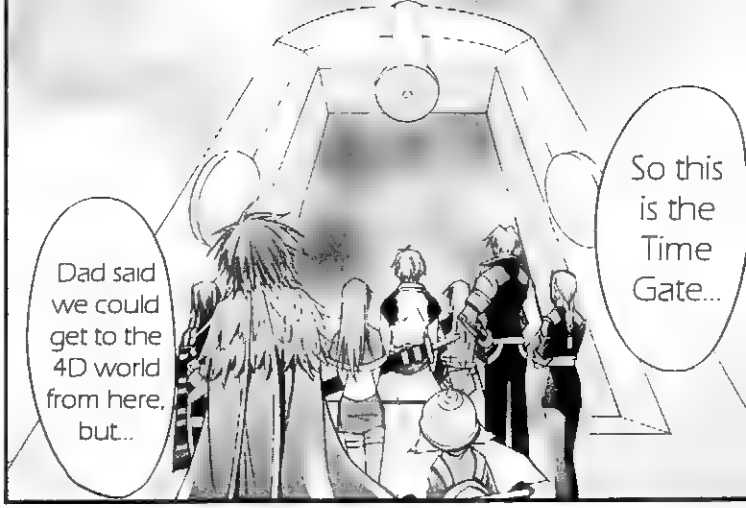
Ah It shouldn't be much further
They're not very serious.
Comm-odore, how much longer to Styx?
I'm fine...
You need to see this!
Comm-odore!
It looks like a cloud around it...
It's a telephoto image of Styx
It's thousands of Execu-tioners surround-ing Styx!
Magnify... It's Exce-cutioners!

Yes It should be heading here right now
Your ship Is the Diplo nearby?
Hm...
But... But then ...!!
We'll distract the Exe-cutioners.
Excellent. You all transport to the Diplo.
We can't afford to let you be stopped here.
You're our last hope.
Kuh...!!
Protecting hope with one's life is the wish of a soldier
So please, just go!

Transport complete Departing the Aquaelie
The Aquaelie is engaging the Executioners.
It's firing!!

Head for the planet!
Hurry!
Under-stood! Entering the atmo-sphere!
Begin-ning descent!
ゴォォ
The Aqua-elie is..!

If the 4D beings really are our creators, then why are they doing this !!
Why are they bring ing so much sorrow to a world they created !!
I cannot forg ve such a God !!



So this is the Time Gate...
Dad said we could get to the 4D world from here, but...

Sophia..?
Uuh...

Symb-ology....?
This is...

This is...
The entrance to the 4D world ...?

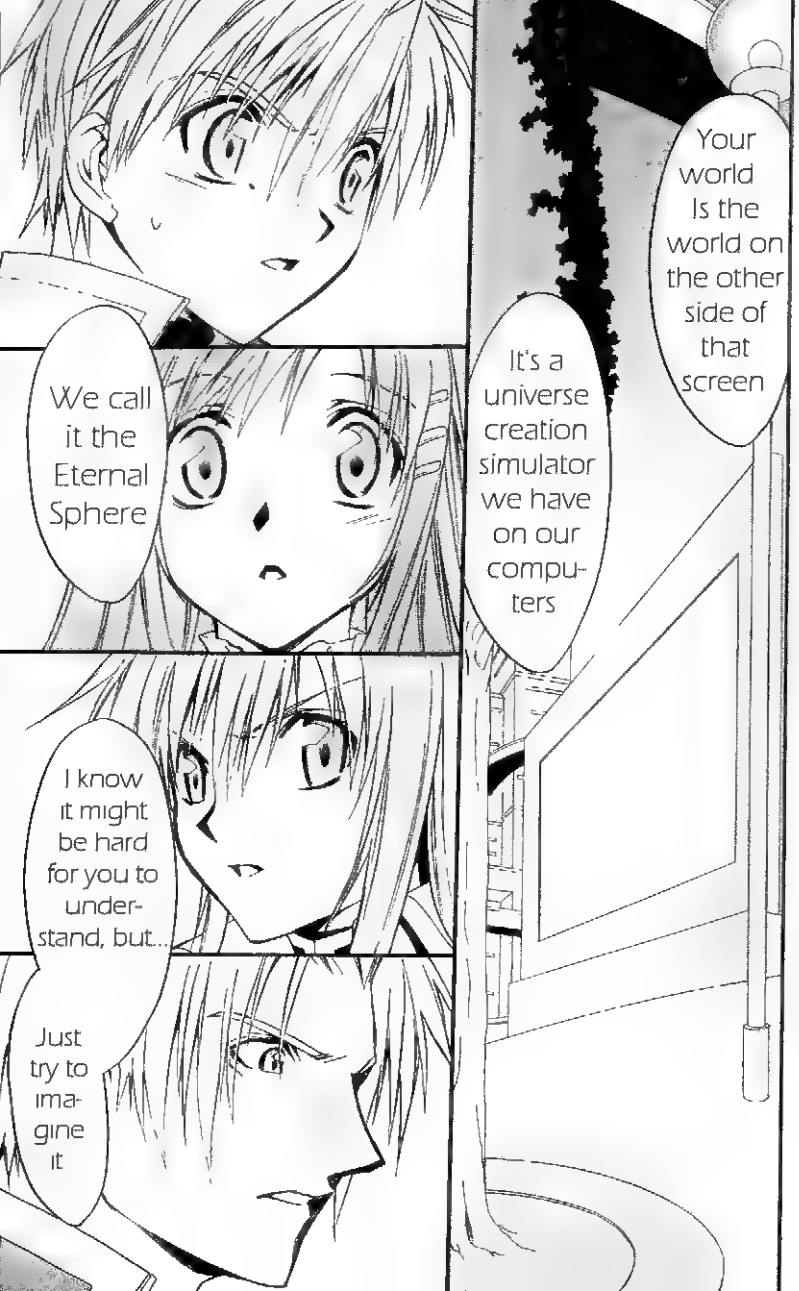
That's
There's no turning back after this.
What should we do?
We'll take those "Creators" out with one shot!
Let's go!
I... I'm ready!
Yes... I feel the same.
I agree.
Every one.
Thank you.

Where should we go from here?
O-O-Okay guys.
Hmph I don't like this atmosphere
It seems so peaceful
You're..
It looks like... a normal city.
Wh.. What is this ..?

It looks like . a normal city. .
Wh . What is this...?

It seems so peace-ful..
Hmph I don't like this atmos phere
O-O-Okay guys.
Where should we go from here?
You're..

Welcome to the Real World.
Or perhaps I should say.. Congrat-ulations
The. Real World ?
What are you..
I know this must seems like some kind of joke to you...
But please listen calmly .. and I'll answer all your questions

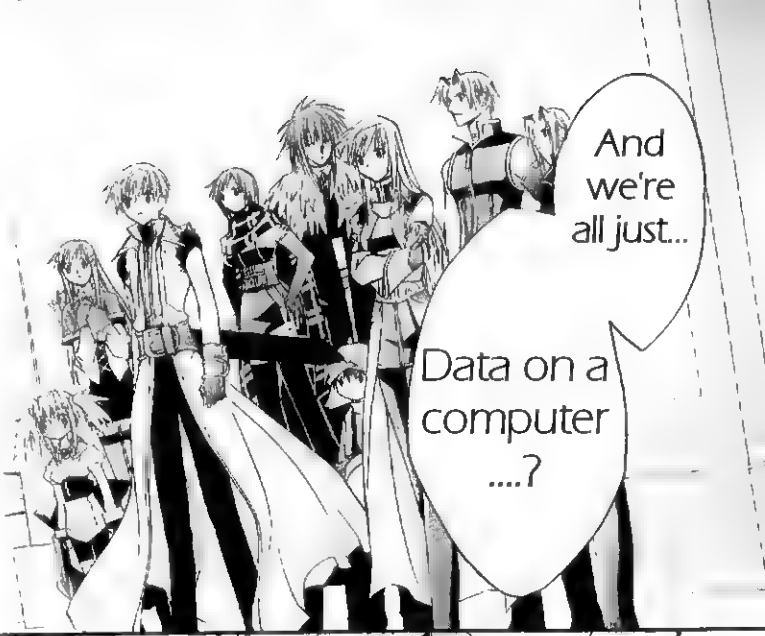


Your world Is the world on the other side of that screen
It's a universe creation simulator we have on our computers
We call it the Eternal Sphere
I know it might be hard for you to understand, but...
Just try to imagine it

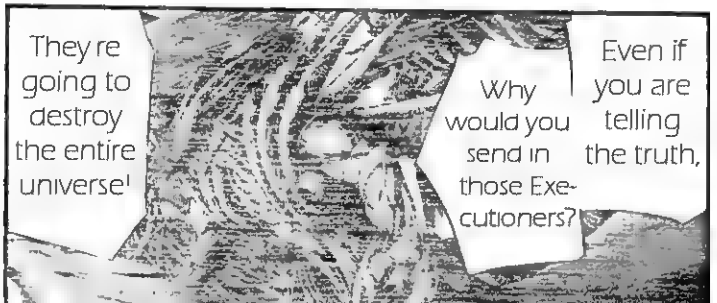
We've been able to make endless virtual realities, indistinguishable from the real world.
Computers are highly developed here
Our world is a virtual reality created by computer.. ?
So, are you saying...
I work as a developer at the company that created it: Sphere Company.
That's right. An amazingly lifelike virtual reality - that is the Eternal Sphere.
And that's the answer we get..?!
We.
We sacrificed so much to come here.

Our universe is all...
A computer simulation...?
Every-thing that happen-ed...
All the people...

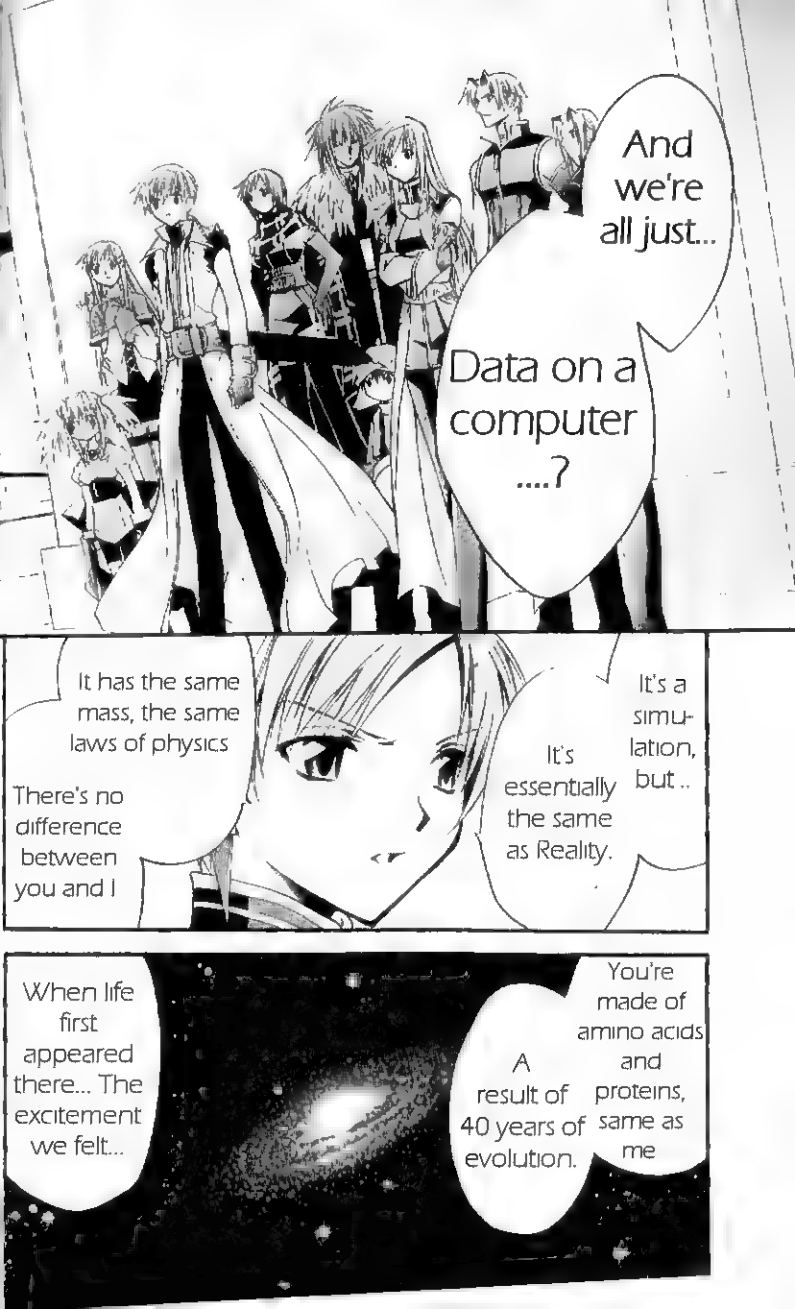
Phase 29: Creator



It has the same mass, the same laws of physics
There's no difference between you and I
It's essentially the same as Reality.
It's a simu-lation, but.



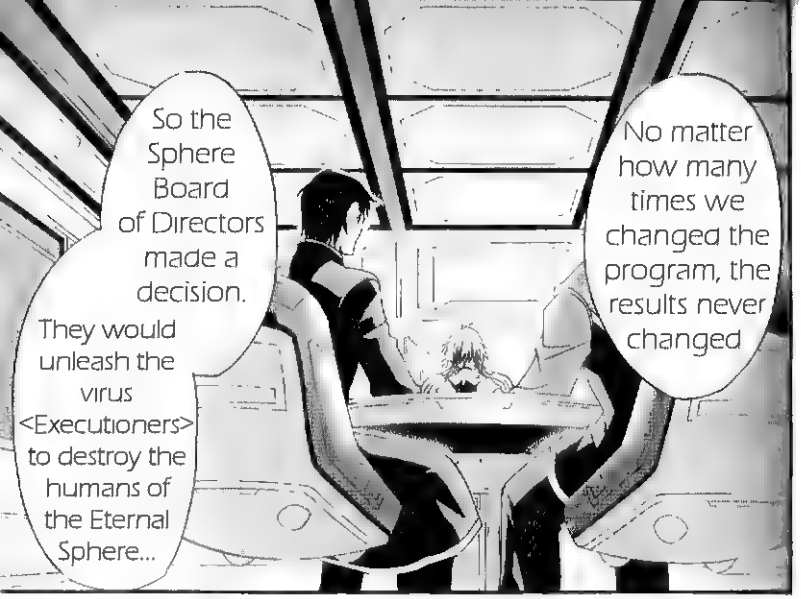
When life first appeared there.. The excitement we felt...
A result of 40 years of evolution
You're made of amino acids and proteins, same as me



And we're all just...
Data on a computer ....?
It's a simulation, but..
It's essentially the same as Reality.
It has the same mass, the same laws of physics
There's no difference between you and I
You're made of amino acids and proteins, same as me
A result of 40 years of evolution.
When life first appeared there... The excitement we felt...

Phase 29: Creator

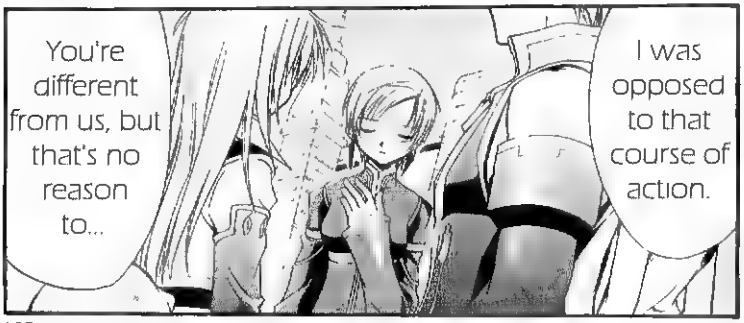
What ?
It's the same as the simul-ation...
What do you mean ..?
Calm down, Cliff.
We ran simulation after simulation
what action should we take?
When you became aware of our Universe,
But the result was always the same
Insurr-ection.



No matter how many times we changed the program, the results never changed
So the Sphere Board of Directors made a decision.
They would unleash the virus <Executioners> to destroy the humans of the Eternal Sphere...

If that's so...
then why are you here?

How can you say such a selfish thing?!



I was opposed to that course of action.
You're different from us, but that's no reason to...

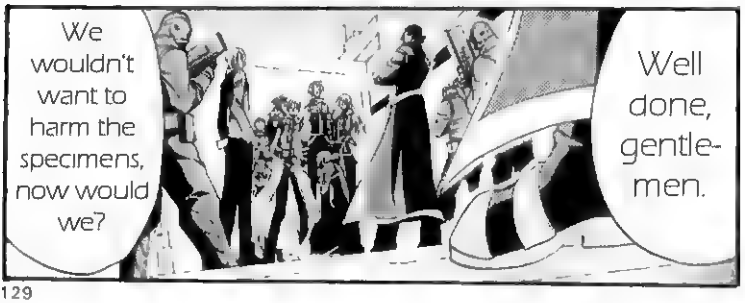
The Eternal Sphere has produced people with a will to rebel.
I know the company has good reason to be afraid.
Then please return to the Eternal Sphere...
If you understand this...
That's
What will become of the Executioners?
But
Cut your ties to this universe..
If you could seal the program, then...

バチッ
The Executioners are technically just a virus,
So if we just uninstall it, then...
That's
Ahhh!!
バチッ
バチバチッ
Hey now, Blair..
You don't have the authority, do you?
You shouldn't say such selfish things.

You're...
Sphere Company's security staff...
Belial and Beelzebub!!

They look dangerous
She said they were security staff

We're surrounded?!



We wouldn't want to harm the specimens, now would we?
Well done, gentlemen.

How disapp ointing, Blair.
So you're the one who sent them..
Aza zel
And we can't allow such valuable specimens to escape
You can't overturn the com-pany's decision

You bastard ....
To think you'd go against your job
Are you saying we're nothing but specimens?!
Haha- They really do seem like real people!
Very impressive!

We won't get specimens like this again!
Be careful not to kill them when you capture them!
Hold up, you two.
Leave this to me

You two go and deal with the Executio-ners.
Cliff!
Ah.. Yes .
Sound good?
And we'll all head home after that
There's no reason for us to stay...
You're right... It seems we're not very welcome here
And guys like these
It's a pretty annoy-ing place.

Didn't you say something about being careful not to kill me?
This should be easy for you, then!!
I can take them on by myself!!

Be careful, damn worm
The one who will defeat you is me.
You're still saying stuff like that, huh
I hate persistant women, you know?

Don't make light of me!
YOU'RE NOTHING BUT DATA!
Rather than make light of you, would you rather I do this?

GUH...!
Nel!
You idiots...
Don't let your guard down in enemy territory.

Nel-san ..
I'll stay here as well
You're always worrying about me.
……
Heh ..I thought you'd say that.
Faytil

I'll stay behind, too! I need to protect this girl!
M... Me?!
So, Fayt,
You can fight without worrying!
Yeah I don't really get it, but,
I'll be cheering you on, too!
That's how it is.

Cliff...
Fayt...

I'm grateful you've come all this way

We've been on quite the journey
I never thought we'd end up in a place like this
Since we met on that planet,

Since this place isn't the end for us!
But I won't say goodbye.
It's time for us to go our separate ways,

You're right
Yeah...
Fayt..
Come on, you two.

Who's gonna be my oppo-nent?
Okay then...
Don't fall behind!
Come on, you lot!
Perfect. I was wanting some-where to fight.
Do your best, everyone!
This looks like it'll be fun!

I don't know, but.. If we go back now, it'll make everything they've done go to waste
Fayt.. Will everyone be okay..?
I couldn't use my powers either...
Yeah I noticed
Our powers..
Come to think of it
He said we needed the power to come to this universe..
Brought our laws of physics to the 4D world...
[Destruction]
You can alter and modify the data of 4D space...
[Alteration]
Is that these sort of people are our creators?
The truth of the world
Dad did you expect this?

This is Sphere Company
The Unistaller for the Executioners is on the top floor, in the President's office
There's guards on the main entrance.
We'll have to go in the back
We can take the freight elevator up.

I want to tell you one thing.
Before we meet President Lucifer,
*Luther's Japanese name
Lucifer is my brother...
I am your ally, but...
At least until we've had the chance to talk, and try to work this out
So please promise .. not to hurt him...
Thank you ..
Yeah... We'd like that, too.

This is the President's Office

Whoa!!
Gasp

Fa . Fayt..
Damn. Where'd that come from. ?
Blair!!
A fitting end for a traitor
Why . ?
Bro-ther...

Why...
Why did you do this....
Lucifer
You're..
I've never heard of such a tenacious bug
It seems I'll have to delete you myself. .

Why not just sit back
In that case
We didn't come here to fight
Please, wait!
And quietly be deleted!!
Imp-ertin-ance
Tch

You can only manage this much, after all....
Hmph

We just want to somehow get rid of the Executioners...
We didn't come here to fight you!!
Listen to me!!

You came here to make a deal?
What's that?
You're very impertinent for a collection of zeros and ones
You should be thankful I made you at all...
To barter with the man who made you?
Fayt...
It doesn't seem like he's willing to talk.
We've got no choice... but to fight!!
This isn't what we came here for, but
This sort of person is our creator

The world outside the sea was only beheld by the eye of a fish.
Earth's primeval sea
But the world spread out even further
Was this a reflection of the universe ...?
And again, in space .
'The World' continued to spread.
Imagining the day when their descendants would end up there..

Stop this, brother
They have souls, the same as us.
Be quiet, Blair!
They're dangerous!

Final Phase: Creation of the Universe
Our universe is nothing more than a simulation inside the FD beings' computers ..!
They think we're nothing more than computer bugs...!

They're here to do us harm
That's why they gained the power to cross dimensions
So you're saying we should just sit quietly by?
Vermin belong in their cages.
No matter how advanced you become, you're nothing more than particularly persistant data
I'm saying you should quietly be deleted

This is what my dad was trying to tell me my whole life
This is the truth
Data should act like data
Be dele-ted!!
Uwah!!

Hmph
Enough playing around. .
Disappear!!
Uwah-!!
GUH-...!
KHAH-...!

One down.
Next is
Gasp-

Take that!
Sophia!!
Don't get cocky!!

Fayt, are you okay?
Aw
?
Sophia!!

You'll pay for fighting back against me.
You filthy bugs.

Lucifer...
The truth is I was hesitating
Since you are our creator, I guess I felt a certain kind of debt to you
Hmph .
What are you saying?
That even if you are our creator...
I won't forgive any more!!
That's !
Symb-ology ...?

No matter what form it takes. .
Such a base attack..
Hmph
You created life!
So take respon sibility!!

Kuh...!!
It's use-less.
You may have created us..

Impo-
ssible
!
But don't
think
deleting
us will
be easy
.....
!!
Wait!!

Brother!!
Your power should be nothing
GHA-!!
iii-HOOOOO

Stop!!

Someone who's only a God when it's convenient.
Has no right to take the lives of people trying their hardest to survive!!
.....

Let's go, Maria...
It's too bad, but I don't think there's any reason for us to stay in this universe anymore.
Yeah, I agree

Are you okay, Sophia?
Fayt..

You've gotten strong...
I'm sorry
You had to go through painful things

Fayt-san
I'll do something about the Executio-ners
For saving my brother,
Thank you
No
I just..
You... damn bugs...!!
!!

Lucifer?!
But I certainly never wished for someone like you lot.
So you think all life is a blessing?
that your generation came along-
But, regardless, I should be glad
So I didn't want to see my mistakes
I poured my heart and soul into this program

It will be like you never existed in the first place!
But now, I'll simply delete the entire Eternal Sphere!
Over...
Game
GUH-!!

Maria, too?!
Sophia!
Fayt.....
Sophia!!
Is everything really gone..?
This..
Fayt
It's just like Lucifer said...!!
It's true..!!

Is everything really gone...?
This .
It's true ...!!
It's just like Lucifer said ..!!
Fayt .

Maria, too?!
Sophia!
FayL....
Sophia!!

Sophia...
No way...
Uu .

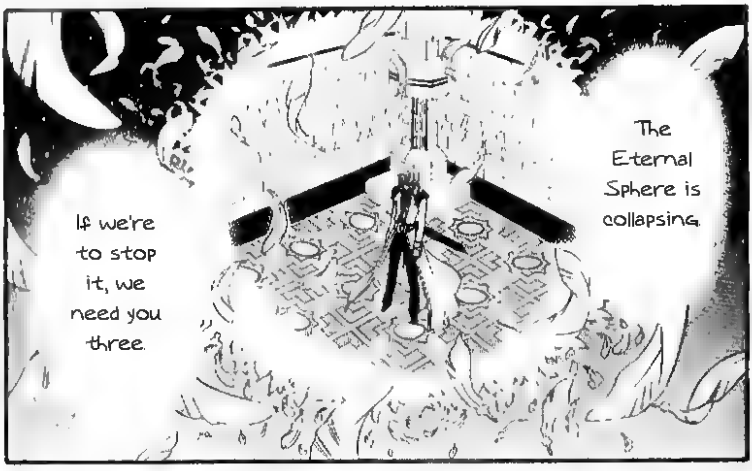
This... This is...
Just for this, we...
You're wrong
Who's there?!
This voice I've heard it before
!!!HOOO

This place is.....!!

That's right The Temple of Apris
Elicoor II.?
Kaddan .. was it?

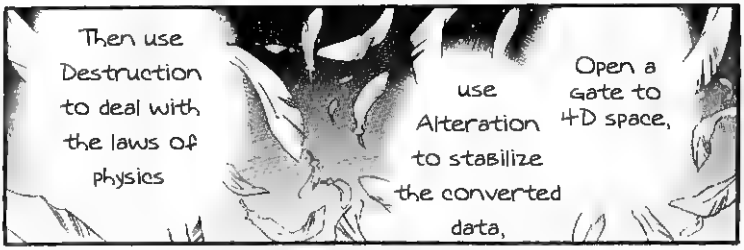
This place is independant of the program
They're tools the developers designed to interface with the Eternal Sphere
I'm speaking to you through the OPA

Elena of Aquaria
That's not important right now.
This voice... You're...



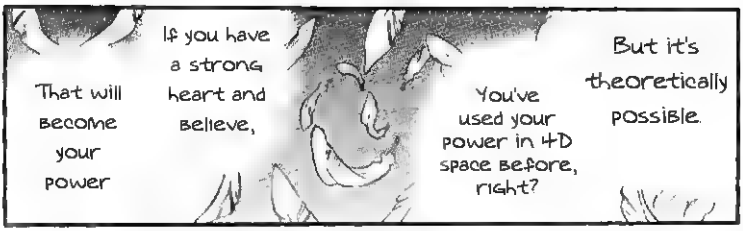
If we're to stop it, we need you three.
The Eternal Sphere is collapsing.

Think... about your powers...
Us..? But, how...?

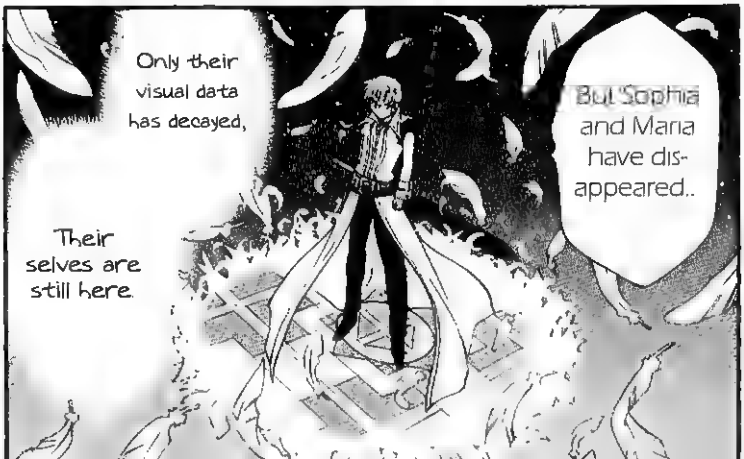


Then use Destruction to deal with the laws of physics
use Alteration to stabilize the converted data,
Open a gate to 4D space,

World Genesis
But that's...
Are you saying I should turn our universe into 4D space?



That will become your power
If you have a strong heart and believe,
You've used your power in 4D space before, right?
But it's theoretically possible.



Only their visual data has decayed,
Their selves are still here.
But Sophia and Maria have disappeared..

I can hear you.
Is Maria ....?
Sophia?
Fayt~
Even if you say it's theoretically possible...
But using our powers to recreate the universe...
Right! Let's do it!
It's not like we have a choice.
Let's go back... to how the universe should be...
Yeah...

Cliff!
While you were asleep, you received 238 messages
O——h...

Being a politician's so boring..
Maybe I should quit.
Please pay attention.
You're an important person to the universe, now
Oh?
Here, you'll want to see this one.
Huh..?
This is..
Ooh!
We'll have to let everyone know

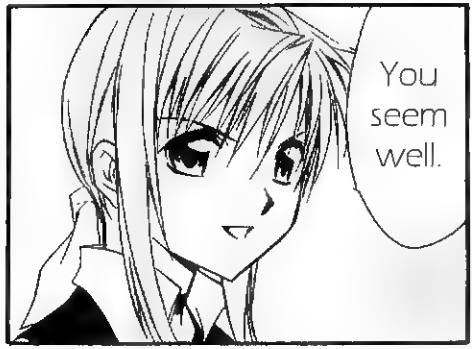
Fayt!
Cliff!
Over here!
What's with your hair?
It's been awhile, huh?
As soon as we meet, you--!
He--y!!

I didn't think you'd come,
Al-bel...
And if I said I came to settle things with you?
What then?
Sure! Anytime, anyplace!
I haven't had a chance to go on a rampage recently!
Hey, the security guard is coming!
I-It's been a long time!

Every-one.
Nel-san. Why are you dressed like that?
YOU SAID THIS WAS CASUAL ATTIRE ON EARTH!!
YOU LIAR! CLIFF!!

5
They haven't changed a bit, have they.

Maria



You seem well.

I'm on stage today!
You all came to see me, right?!

Hey—!!
It's about to start, so cut it out!!

掲載・月刊少年ガンガン平成17年7月号・11月号

I'm surrounded by my irreplacable friends,
So I believe there was meaning in that fight.
A long, long time from now,
I wonder if we'll tell our decendants how this world came to be. ?
